sealtight®
The easy durable way to stay dry™

WHAT IS YOUR PPE IQ?

COVID-19 spreads mainly from person to person through respiratory droplets produced when an infected person coughs, sneezes, or talks. These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs. Studies and evidence on infection control report that these droplets usually travel around 6 feet (about two arms lengths).

Your cloth face covering may protect them. Their cloth face covering may protect you.

DID YOU KNOW ?

Many industries and consumers are finding shields easier to use than masks! In addition to healthcare workers, teachers, dentist offices, salons, multiple manufacturing sites (including our own), meatpacking plants and massage therapists are just some examples of the people we help every day.

dentist | healthcare workers | stylist | teacher | massage therapist | meatpacking plants | restaurant workers

WHY CLOTH MASKS WORK

Protect others in case you're infected but don't have symptoms

Provide an extra layer to help prevent respiratory droplets from traveling in the air and onto other people.

An estimated 20% of cases are ASYMPTOMATIC.

Use PPE to protect the mucous membranes of the

eyes, nose and mouth.

PROPER WEARING

WEAR ENTIRE TIME YOU ARE IN PUBLIC

- wash hands before applying
- check you can breathe easily
- fully cover mouth + nose
- secure under chin
- no gaps
- snug fit

BEST PRACTICES

wear masks for all daily activities

wash masks frequently

switch out clean masks daily to reduce spread
