Therapeutic Products for Restful Sleep

IMAK Sleep Therapy products are designed to aid anyone suffering from pain, tension and stress during rest or nighttime sleep routines.

The Eye Pillow was designed by an Orthopedic Surgeon. It utilizes massaging ergoBeads, providing a comfortable weighted compression that conforms to your face and eyes. It's guaranteed to block out light. For added stress relief, place Eye Pillow in the freezer to provide cool relief.

The HappiNeck offers ergonomic neck comfort and support, for traveling or relaxing. The HappiNeck gently contours to your neck and shoulders, offering complete support and relaxation all around. The HappiNeck can be used alone or in combination with a standard pillow.
