Nice Stretch® History

Nice Stretch Original was born in 1997. It was the first night splint to enter the market with built-in cold therapy. The product, brought to life by a podiatrist and a team of designers at Brownmed, quickly garnered a patent and marketplace recognition for its unique design.

Since Nice Stretch Original's launch, four other night splints have been introduced, all with very specific requirements in mind.

In addition to the Original, the Nice Stretch line now features a dorsal product, a universally-sized splint and a fixed-angle device, allowing you to select the perfect product for your needs. Five Nice Stretch products are available in attractive retail packaging, and one has earned the Arthritis Foundation's Ease of Use Commendation. Two are patented. All are designed with patient comfort in mind.

Wakeup better.™

“Eighty-eight percent of patients who completed the study improved...Improvements were maintained at study completion. Response to splinting did not correlate with foot type, degree of obesity, or the presence of heel spur on radiographs. We believe dorsiflexion splints provide relief from the symptoms of recalcitrant plantar fasciitis in the majority of patients.”<sup>1</sup>

1. “Effective Treatment of Chronic Plantar Fasciitis with Dorsiflexion Night Splints: A Crossover Prospective Randomized Outcome Study”; Powell M, Post WR, Keener J, Wearden S; Foot Ankle Int<sup>®</sup>; Jan 1998; 19(1).
