

Day/Night Wrist Support Solutions

The WrisTimer® and WrisTimer® PM provide 24-hour support and pain relief for carpal tunnel syndrome, arthritis and tendonitis.

Daytime Wrist Support

WrisTimer wrist support provides therapeutic treatment during the day to avoid damaging wrist flexion during work or activity, while allowing a healthy range of motion. Adjusts easily for stable and comfortable compression of the wrist and desired range of motion.

Therapeutic Treatment for Night

WrisTimer PM wrist support provides therapeutic treatment during the night while allowing a comfortable fit to prevent flexion of the wrist. The aluminum stay holds the wrist in a neutral position to reduce inflammation and provide support.
