

VIBRATING STEP SENSOR

FOR PEOPLE WITH WALKING IMPAIRMENTS

Designed specifically for people with peripheral neuropathy, drop foot and other forms of nerve impairment. The Step Sensor may help users immediately regain confidence in their walk.

Discreet, easy-to-use and comfortable, the Step Sensor works by providing a gentle vibration just below the knee when the heel hits the ground, encouraging the user to lift their foot and instantly making for a smoother, less awkward gait.

STEP SENSOR MAY:

- Increase walking speed
- Improve balance
- Increase confidence

Adjustable band

Extra wide banding holds Step Sensor securely and comfortably in place. Easy to use and discreet.

Available by prescription only
